PLAY & PARK STRUCTURES
BE BOLD!
PLAY & PARK STRUCTURES

BOULDERSCAPES

Systems allow children ages 5-12 to **BOLDLY** go beyond a traditional playground experience by offering a variety of paths and problem solving opportunities. Multiple net angles, rock heights, and textured climbing surfaces inspire physical and cognitive challenges, propelling children to creatively plan their horizontal and vertical ascents and descents. Best of all, every child, regardless of their ability, can get into the middle of the action!

A PLAYCORE Company

Rotationally Molded Rocks
require less maintenance than comparable concrete boulders and are more affordable to ship and install.

Flexible Cable
provides an advanced challenge

Connect a
Boulderscapes
climbing system to your
traditional playground
structure for even more variety
on the playground.

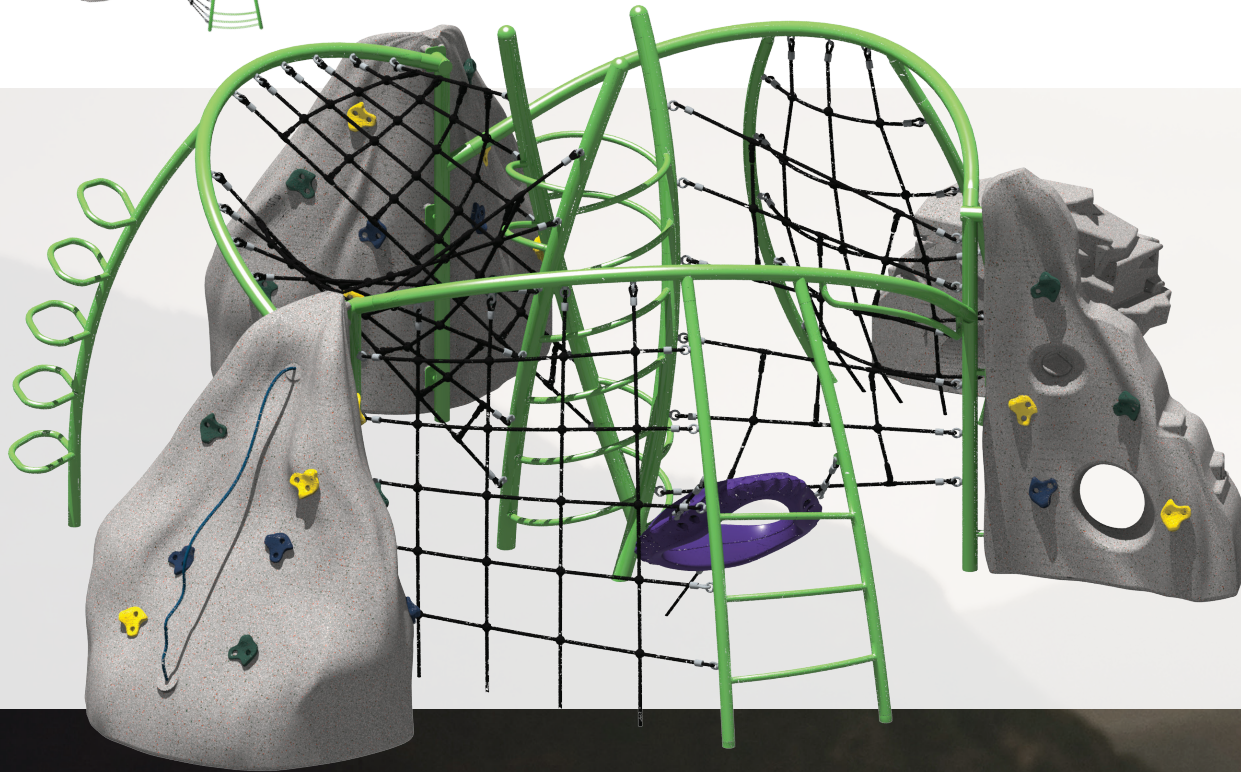

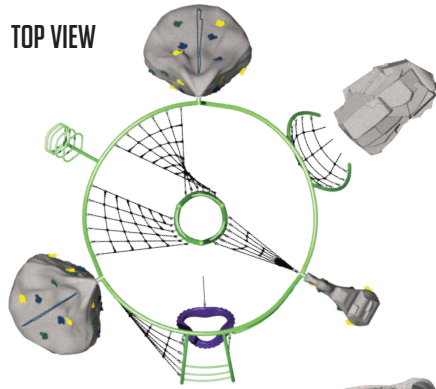

Boulderscapes
climbing systems can be
configured to fit within
your space.

Pre-designed structures are available or **Boulderscapes**
can connect to a traditional playground structure.

Continuous, lateral climbing promotes strength and stamina
