

Douglas Road Elementary School, Lambertville, Michigan

Surrounded by poured in place, blue-tinted rubber surfacing designed to represent water, this new playground structure features gentle sloping ramps that can be easily accessed by mobility devices. Once children reach the main deck area, two separate ship's wheels allow for multiple navigators to man the helm of this whimsically designed vessel. Interactive panels provide additional opportunities for children to play games and socialize as they move their way up the structure. Several freestanding events are included in the space; the Jump-to-It, a challenging standing see saw, a large pyramid net, and Dual Oval Swings, allowing 3 children to swing together at once.

Project Date: October, 2015
